**DETAILED ACTION**

***Amendment***

1. Receipt is acknowledged of the Amendment filed January 3, 2006 and the Request for Continued Examination filed February 21, 2006.

***Allowable Subject Matter***

2. Claims 1-20 are allowable over prior art.

3. The following is an examiner's statement of reasons for allowance: The best prior art of record, taken alone or in combination, fails to specifically teach or fairly suggest the optical code reader or the method for adjusting focus of an imaging optics assembly as disclosed in the current invention. Specifically prior art fails to teach the optical reader including a chassis, an image data receiving and processing assembly connected to the chassis, and an opto-mechanical barrel assembly for housing an imaging optics assembly, wherein the opto-mechanical barrel assembly is pivotally mounted on the chassis such that pivotal movement of the opto-mechanical barrel assembly relative to the image data receiving and processing assembly alters a linear distance between the opto-mechanical barrel assembly and the image data receiving and processing assembly and adjusts the focus of the imaging optics assembly on a target image. Prior art additionally fails to teach the method for adjusting focus of an imaging optics assembly, which includes the limitations discussed above. The claimed optical code reader and the method of adjusting focus of an imaging optics assembly are not taught by prior art and moreover, one of ordinary skill in the art would not have been motivated to come to the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
